A new steel profile system according to an individual life philosophy

Jansen Art 15 is the result of many years of collaboration with the best European architects.

Today's architects and designers are putting this finest system on the market; hence, a new philosophy of windows, doors, and new facade solutions is emerging.

The uninsulated steel is perfect solution for interior design of both existing buildings and future construction projects.

Architects and manufacturers have freedom to implement their innovative and creative ideas.

Experience space the sophisticated way

Space and lighting are important qualities when creating home interior and cosiness. *Jansen ART 15* system is a great way to divide rooms by saving the internal space and preserve continuous comfort and modern environment.

The reduced external face widths of the profile allows for a unique design and sets new standards for the interior.

The Art 15 Double doors provide the interior with an exclusive ambiance and an unprecedented feeling of space.

An aesthetics and transparent feeling of space

With slimline ART 15 profiles, you can experience a unique world inspired by *Houte Couture* and *Houte Cuisine*. These doors may be completely sealed and thereby create harmony between the aesthetic and comfort.

As a result of improved acoustic and odour barriers, you can have a completely new experience of your home. Noise and unpleasant odours will become a thing of the past, and you will have an opportunity to enjoy a breath-taking and transparent sense of space in your spacious and bright room.

Jansen Art 15 partitions separate the entrance hall from the living space, the kitchen from the dining area, or the home office from the living room.

Style and comfort, even in day-to-day environment

The uninsulated profile system expands the space for the creative ideas of the ambitious architects when installing steel systems in villas, shops, food supply or professional spaces.

Slimline steel profiles of the highest standards

Jansen Art 15 is the ideal combination of materials and efficiency. The wide variety is perfect for renovation of modern residential property. Width of the narrowest profile face is only 25-40 mm for fixed glazing and a basic depth of 50 mm. Intricate yet stable constructions with a large proportion of glass and excellent thermal insulation can be created.

Multifaceted design freedom

In the traditional production of *Jansen Art 15*, every product is a unique exemplar - a durable system with modern design. Welded joints are not just strong, they also allow for unlimited design freedom. Expectations and requirements of this system design can be implemented in an individually flexible manner. Whether simple, industrial, classical or playful, you can create the perfect space that fits your individual lifestyle.

Attractive living

When *Jansen Art 15* doors are completely closed, the door handle becomes the showcase product. Only selected partners manufacture *Jansen* system. Technical advantages may be viewed on our homepage. *Jansen* partners will help you to create the ideal interior for you. You will also receive tailored advice about sound insulation, design and specially designed door fittings.
